

Flush Joint Casing Clamp

The UMS Flowell Flush Joint Casing Clamp is used where space is premium and flush joint casing is required. The clamps are low profile for fitting in tight spaces, and grip the cables or service lines against the body of the casing.

Internal teeth on the clamp provide a grip on the casing to prevent the clamp from slipping.

FEATURES & BENEFITS

- For flush joint casing where space is limited
- Internal teeth for gripping clamp to the casing
- No stop collars required
- Grips and protects cable and or service lines
- Precision investment casting
- Lightweight and robust
- 5-1/2" to 10-3/4" sizes available

SPECIFICATIONS

- Low alloy or 13Cr equivalent investment casting with Inconel 718 fasteners
- 14 ton load on clamp face before slippage
