

Non-Sealing Pod Sleeve And Support Ring

The Non sealing Pod sleeve and support ring provides a means for landing the Non-Sealing pod hanger and securing the hanger in place.

This allows string forces to be transmitted from the hanger into the shroud casing/ tailpipe and production tubing string so that the ESP is isolated from any loads.

FEATURES & BENEFITS

- Landing shoulder and retaining ring to secure the hanger axially
- Casing thread for attaching the shroud casing
- Grub screws to prevent support ring thread back off

SPECIFICATIONS

- Low alloy steel or 13Cr metallurgy
- Pin connection to match shroud casing

Technical Specifications - Non-Sealing Pod Sleeve And Support Ring

| Part Number | Pod casing size (in) | Pod Casing Connection | Comments |
|--------------|----------------------|--------------------------|--|
| SHRD-0039 | 7-5/8 | 7-5/8" 29.7# VAM FJL PIN | Without 10ft casing pup joint |
| SHRD-0057 | 7 | 7" 29# API BUTTRESS | Without 10ft casing pup joint |
| SHRD-0060 | 7-5/8 | 7-5/8" 29.7# VAM FJL PIN | With 10ft casing pup joint |
| SHRD-0062 | 7-5/8 | 7-5/8" 33.7# VAM FJL PIN | Without 10ft casing pup joint |
| PS-5500-0056 | 5-1/2 | 5-1/2" 15.5# F2J NS PIN | With 10ft casing pup joint and casing clamp groove |
