

## Non-Sealing Pod Worktable

The worktable for the non-sealing pod is a lightweight worktable that is an elevated C-plate arrangement allowing the MLE and service lines to enter the shroud without the risk of damage when landing the ESP lifting clamp.

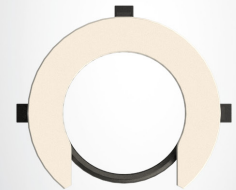

The C-shape opening is large enough to fit past the outside of the ESP so that it can be installed or removed at anytime from the top of the shroud sleeve.

### FEATURES & BENEFITS

- Lightweight design with lifting handles
- C-shape to allow assembly and removal with the ESP installed
- Elevated level so that MLE and service lines can enter the shroud without the risk of damage

### SPECIFICATIONS

- 10Te SWL
