

## Internal Tubing & Casing Drifts

UMS Flowell provides API Drift, Alternative Drift and Special Drift mandrels for drifting tubing, casing, and completion equipment.

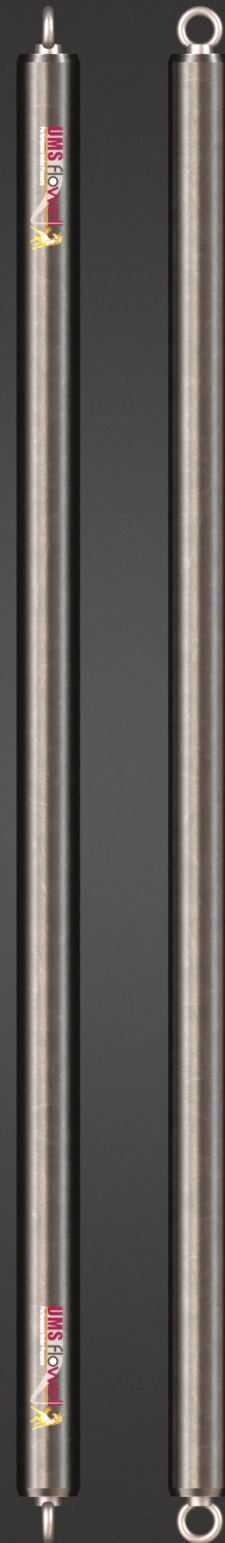

A variety of metallic and non-metallic drifts can be provided in hard wearing stable materials. The drifts are typically provided with eyelet ends for pulling through long assemblies with a rope.

### Features & Benefits

- High quality tolerance using stable materials
- Lightweight and robust
- Metallic and non-metallic drifts (non-metallic drifts for drifting chrome and exotic materials)
- Eyelets ends for attaching a pulling line

### Specifications

- API Drift
- API Alternative Drift
- Special Drift

## Internal Tubing & Casing Drifts

| Part Number | Tubing Size      | OD (in) +0.005"/-0.000" | Length (in) |
|-------------|------------------|-------------------------|-------------|
| ID-2125-24  | 2-1/8" 2.4lb/ft  | 1.717                   | 42          |
| ID-2375-46  | 2-3/8" 4.6lb/ft  | 1.901                   | 42          |
